

A calcium-based supplement supporting bone health or low calcium levels.

Developed by cancer doctors and pharmacists for bone health or low calcium levels while minimizing interference with cancer treatments.

Feel better and do better.

An all-natural supplement specifically formulated for cancer patients during and after treatment.

A person can develop low calcium levels or bone deterioration as a side effect of cancer treatments and/or age. It is very important to talk with your doctor about how much calcium is needed.

Take 4Bones with confidence, a *trusted* calcium-based supplement.

Information on calcium needs can seem overwhelming... What is helpful to take? When and how much?

Why choose 4Bones?

- Supports bone health during and after cancer treatment
- Provides appropriate vitamins for low calcium levels and bone health
- All-natural supplement and part of a holistic approach to care
- Minimizes interference with cancer treatments
- Designed by cancer doctors and pharmacists
- Backed by science and research

Who should take 4Bones?

Any person who needs calcium for bone health or has low levels of calcium.

How should I be taking 4Bones?

Generally, 4Bones should be taken as two tablets 1-2 times a day with food as recommended by your cancer provider/physician. If taking three or more tablets daily, don't take them all at once. Dosage and frequency should be individualized and recommended by your cancer provider/physician.

What is unique about 4Bones?

Developed by cancer doctors and pharmacists to address low levels of calcium and bone health, while minimizing interference with cancer treatments.

For Example:

- 4Bones includes the appropriate amount of Vitamin D, which is important for cancer patients and those with low levels of calcium.
- An appropriate dose of magnesium helps with constipation and potentially improves calcium absorption.
- 4Bones is a high-quality evidence-based wellness product that addresses bone health and low levels of calcium.

Feel better and do better.
