

SafeVite

A once-a-day multivitamin supporting wellness for those living with or beyond cancer.

Created by Oncologists.

Developed by oncologists and oncology pharmacists who understand the unique nutritional considerations during and after treatment.

Choosing the right supplement during and after treatment can feel overwhelming.

SafeVite was developed to make that decision easier — *a single daily multivitamin, thoughtfully formulated.*

Some vitamins can interact with certain treatments.

SafeVite is formulated with that research in mind — *so your multivitamin is one less thing to worry about.*

Feel better and do better.

SafeVite

Information on vitamins and supplements is overwhelming...
Patients ask: What is helpful to take? What should be avoided?

Why choose SafeVite?

- A once-daily multivitamin developed specifically for those living with or beyond cancer
- Formulated to complement your care, not complicate it
- Developed by oncologists and oncology pharmacists
- Backed by science and research

Who should take SafeVite?

Adults living with or beyond a cancer diagnosis, during or after treatment.

How long should I take SafeVite?

SafeVite is designed for continuous daily use to support long-term wellness.

What is unique about SafeVite?

Using current references and research, our team focused on the vitamins most appropriate for those living with or beyond cancer – and excluded those that aren't.

For example:

- The U.S. Preventive Services Task Force recommends against Beta-Carotene and Vitamin E for cancer prevention. SafeVite excludes both.
- Some vitamins are commonly discussed in oncology research as potentially interacting with treatment. SafeVite was formulated with this research in mind.
- Elevated calcium can be a concern in oncology care, which is why SafeVite is formulated without added calcium. Talk to your care team about your individual needs.
- Vitamin D is widely discussed in oncology research as an important nutrient to monitor – SafeVite includes it to support nutritional wellness.
- Vitamins B6 and B12 are included to support nutritional wellness.
