- Fennel powder 500mg

Discussion

Have you considered the non-pharmaceutical aspects of your patients' treatment? Most physicians don't have time to research the thousands of supplemental products available today. Many patients are concerned about whether they are doing everything possible to assist in their wellness. They research it themselves on the internet and ask friends and family for advice in choosing supplements. This process may be detrimental or interfere with their treatment protocol.

4CancerWellness's team of oncologists and oncology-focused pharmacists research each supplement carefully, ensuring that they will not interfere with treatment or recovery. Doctors and nurses can therefore recommend 4CancerWellness supplements to their patients with confidence. Patients will also feel reassured knowing that their supplements were recommended by their doctor, increasing good will towards the practice.

Business with 4CancerWellness LLC
