

# 4Neuropathy

**A natural supplement for relief of neuropathy  
during and after cancer treatment.**

**ONCOLOGIST  
APPROVED**

Nerve pain and numbness from neuropathy  
is a common side effect of treatment.

## **Recommend with Confidence**

Researched and approved by our team of  
oncologists and oncology-focused pharmacists  
to not interfere with treatment.

Our specific ingredients support relief from  
neuropathy without the risk of interfering  
with treatment.

## Description

A natural supplement for relief of neuropathy during and after cancer treatments

- Specially formulated for cancer patients who often experience neuropathy, seen in at least 25–40% of cancer patients.
- Researched to not interfere with cancer treatments and be appropriate for cancer patients without exceeding doses when used with other 4CancerWellness supplements, unlike many other products.

## Details

### 1. What causes the problem, that is specific to cancer patients?

- Chemotherapy, some targeted drugs.

### 2. What does it do?

- Supports nerve regeneration and addresses neuropathic pain.

### 3. Are we avoiding any ingredients?

- Avoid vitamin E frequently not advised when on chemotherapy or radiation therapy.
- Lipoic acid as a supportive antioxidant is frequently not advised when on chemotherapy or radiation therapy.

### 4. Are we controlling any doses?

- Limiting B-6 to avoid the cause of neuropathy.

## Ingredients

All ingredients researched to be non-carcinogenic.

- Vitamin B6 18mg as pyridoxine HCL (700% RDA)
- Vitamin B12 250 mcg
- Cinnamon um verum Extract 500mg
- Benfotiamine 150mg
- Inositol 500mg

## Discussion

Have you considered the non-pharmaceutical aspects of your patients' treatment? Most physicians don't have time to research the thousands of supplemental products available today. Many patients are concerned about whether they are doing everything possible to assist in their wellness. They research it themselves on the internet and ask friends and family for advice in choosing supplements. This process may be detrimental or interfere with their treatment protocol.

4CancerWellness's team of oncologists and oncology-focused pharmacists research each supplement carefully, ensuring that they will not interfere with treatment or recovery. Doctors and nurses can therefore recommend 4CancerWellness supplements to their patients with confidence. Patients will also feel reassured knowing that their supplements were recommended by their doctor, increasing good will towards the practice.

## Business with 4CancerWellness LLC
