

# 4Teeth

**A natural daily supplement proven to resist the loss of tooth enamel and decay caused by cancer treatment.**

**ONCOLOGIST  
APPROVED**

## **Recommend with Confidence**

Researched and approved by our team of oncologists and oncology-focused pharmacists to not interfere with treatment.

Loss of tooth enamel and decay are common side effects of cancer treatment.

Xylitol is proven to resist the loss of tooth enamel and decay and 4CancerWellness is providing various forms and flavors to meet patients needs.

## Description

Cancer patients frequently experience enamel and tooth decay as well as increased risk of caries from treatment. These issues may occur indefinitely even after treatment.

4Teeth comes in various forms (gum, mints, toothpaste or wafer form) and is formulated to provide maximum strength in fighting the bacteria that causes oral issues.

Xylitol inhibits the growth of the bacteria that cause cavities. It does this because these bacteria (*Streptococcus mutans*) cannot utilize xylitol to grow. Over time with xylitol use, the quality of the bacteria in the mouth changes and fewer and fewer decay-causing bacteria survive on tooth surfaces.

## Details

### 1. What causes the problem, that is specific to cancer patients?

- Chemotherapy and radiation therapy.
- Targeted therapy (throat and mouth area).

### 2. What does it do?

- Xylitol is widely accepted as the best natural ingredient for enamel loss and tooth decay relief.
- Peppermint is not only favorable to the taste, but it also has been linked to nausea relief.

## Ingredients

All ingredients researched to be non-carcinogenic.

- Xylitol, 1.06 grams
- Peppermint based flavor blend (Proprietary Blend)

## Discussion

Have you considered the non-pharmaceutical aspects of your patients' treatment? Most physicians don't have time to research the thousands of supplemental products available today. Many patients are concerned about whether they are doing everything possible to assist in their wellness. They research it themselves on the internet and ask friends and family for advice in choosing supplements. This process may be detrimental or interfere with their treatment protocol.

4CancerWellness's team of oncologists and oncology-focused pharmacists research each supplement carefully, ensuring that they will not interfere with treatment or recovery. Doctors and nurses can therefore recommend 4CancerWellness supplements to their patients with confidence. Patients will also feel reassured knowing that their supplements were recommended by their doctor, increasing good will towards the practice.

## Business with 4CancerWellness LLC

### 4CancerWellness branded product line provides:

- Marketing materials designed for patients.
- Easy ordering and fulfillment process.
- An excellent compensation package for practices and networks.

### White label branded product line provides:

- Full service white label branding to your practice or network at a below average cost (branded to your company's identity).
- Easy ordering and fulfillment process.
- An excellent compensation package for practices and networks.
